Data Structures, Operating Systems, Application Programming, Database Management and Systems, Computer Architecture and Organization, Embedded Systems

PROJECTS

Job-Board | (React.js, MaterialUI, Rapid Api)

[Github](#) – [Live](#)

- Real-time Job Search: A **React.js** website using Material UI to display real-time job postings fetched from the **JobSearch API** (Rapid API).
- Material UI** for UI Development: The user interface (UI) of the website is developed using Material UI, a React component library known for its modern and visually appealing design.
- Pagination** Support: To enhance usability, the website displays 10 companies per page, and pagination is implemented to allow users to easily navigate through multiple pages of job listings.
- Job Name Search**: The site offers a search functionality that enables users to search for specific jobs by their names. This feature helps users find relevant job opportunities that match their preferences.

CoinStats | ReactJs, ChartJs, Material UI

[Github](#) – [Live](#)

- Real-time Cryptocurrency View: A **React.js** website displaying real-time data of various cryptocurrencies by the use of **API** which contains more than 200 currencies
- Material UI** Integration: Material UI is used to create an attractive and responsive CoinPage.
- UI Carousel**: Interactive **UI Carousel** for seamless navigation between Coins.
- Chart.js** Integration: Detailed data of each currency shown in weekly, monthly, and yearly charts.
- Search Functionality: Users can search and view specific Coin details on a dedicated page.
